

Agency Verified Subscriber Paid

The FirstNet Subscriber Paid Program allows FirstNet-eligible users the ability to acquire, manage and pay for their own individual FirstNet account.

Agency Verified Subscriber Paid (AVSP): This term is used to describe users or organizations where a Subscriber Paid (Sub Paid) administrator provides verification of a user's eligibility for FirstNet service. A user can be added to an organization's AVSP program if the Sub Paid Admin adds the user directly, or if the user signs up online or in-store using the organization's affiliation code.

Eligibility requirements for AVSP users

To remain eligible for AVSP FirstNet service, a user must meet both of the following requirements:

- Be a current employee or an active volunteer with your organization.
- Be in a FirstNet-eligible job title/function.
 - » Visit [Firstnet.com/help](https://firstnet.com/help) for more details.

Periodic audits of users will be conducted by the AVSP administrator. If a user is found to no longer meet the above requirements, the administrator will remove the user from their AVSP program. The user will then either move to a Self Verified Subscriber Paid Program or be offboarded from the FirstNet network.

Benefits of AVSP service

1. Access to organization-specific programs and applications:
 - » Push-to-talk applications
 - » FirstNet Messaging
2. Potential waived fees (activation and/or upgrade)
3. More diverse [job titles](#) available in the AVSP signup flow
4. Streamlined eligibility verification process

How to start an AVSP organization
