

Log Into Your Fusion Account as an AT&T / FirstNet User (Wi-Fi Authentication) Android smartphones

Important: Before proceeding, determine if your device has a FirstNet or AT&T SIM. If yes, you should log in via SNAP authentication, which allows fast, automatic user authentication to the Fusion service by reading SIM data. If you do not have an AT&T or FirstNet SIM, you should authenticate via Wi-Fi.

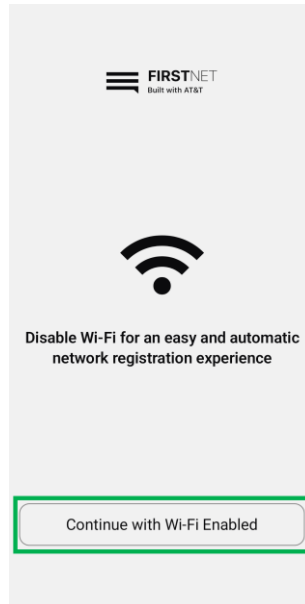

Before you begin, confirm that your organization administrator has assigned you a Fusion license and created your account. Once your setup is complete, follow the steps below to log in using Wi-Fi Authentication.

1. First, download and install the application from Play Store.

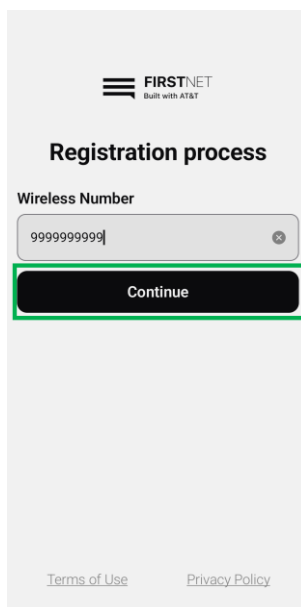

Play Store > Search and install FirstNet Fusion

2. Next, access the Fusion app on the device. If SNAP automatic authentication is not possible, wait until the message **Continue with Wi-Fi Enabled** appears and select it.

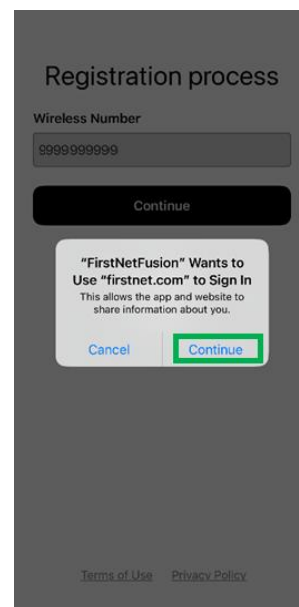

Select Continue with Wi-Fi Enabled

3. In the next screen, insert your phone number (ten-digit number with no spaces or special characters) and press the **Continue** button. The app asks you to sign in using firstnet.com, tap **Continue**.

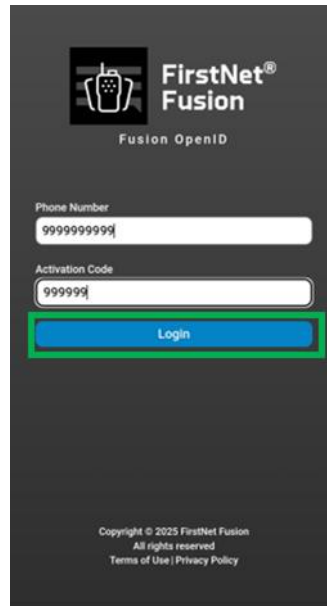

Insert your phone number

Tap Continue

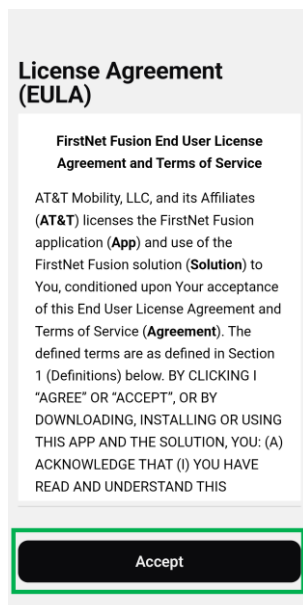

- Then, you are brought to the activation screen. Type in the activation code received via SMS, then tap the **Login** button.

The image shows the FirstNet Fusion login screen. At the top, there is a logo with a radio icon and the text "FirstNet Fusion" and "Fusion OpenID". Below the logo, there are two input fields: "Phone Number" with the value "999999999" and "Activation Code" with the value "999999". A blue "Login" button is highlighted with a green border. At the bottom, there is a copyright notice: "Copyright © 2025 FirstNet Fusion. All rights reserved. Terms of Use | Privacy Policy".

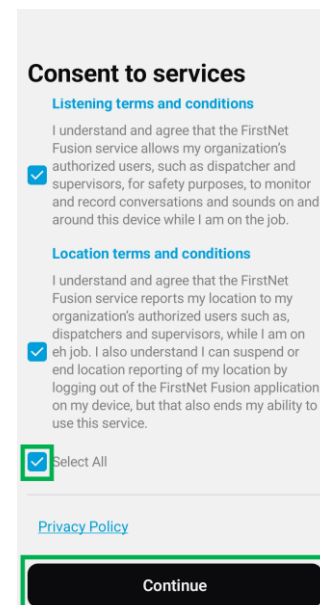

Insert your activation code then tap Login

- After the login, you are redirected to the EULA page. Read and Consent to Service.

The image shows the "License Agreement (EULA)" screen. The title "License Agreement (EULA)" is at the top. Below it, the text reads: "FirstNet Fusion End User License Agreement and Terms of Service". The main body of text states: "AT&T Mobility, LLC, and its Affiliates (AT&T) licenses the FirstNet Fusion application (App) and use of the FirstNet Fusion solution (Solution) to You, conditioned upon Your acceptance of this End User License Agreement and Terms of Service (Agreement). The defined terms are as defined in Section 1 (Definitions) below. BY CLICKING I 'AGREE' OR 'ACCEPT', OR BY DOWNLOADING, INSTALLING OR USING THIS APP AND THE SOLUTION, YOU: (A) ACKNOWLEDGE THAT (I) YOU HAVE READ AND UNDERSTAND THIS". At the bottom, there is a black "Accept" button highlighted with a green border.

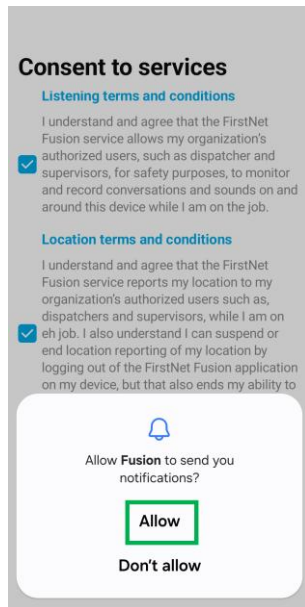

Accept License Agreement

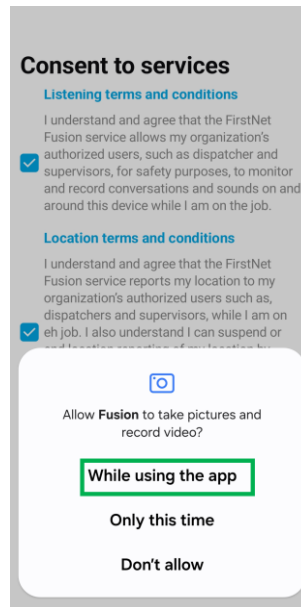

The image shows the "Consent to services" screen. The title "Consent to services" is at the top. Below it, there are two sections: "Listening terms and conditions" and "Location terms and conditions". Each section has a checkbox that is checked. The "Listening terms and conditions" section states: "I understand and agree that the FirstNet Fusion service allows my organization's authorized users, such as dispatcher and supervisors, for safety purposes, to monitor and record conversations and sounds on and around this device while I am on the job." The "Location terms and conditions" section states: "I understand and agree that the FirstNet Fusion service reports my location to my organization's authorized users such as, dispatchers and supervisors, while I am on eh job. I also understand I can suspend or end location reporting of my location by logging out of the FirstNet Fusion application on my device, but that also ends my ability to use this service." At the bottom, there is a "Select All" checkbox that is checked, a "Privacy Policy" link, and a black "Continue" button highlighted with a green border.

Check the boxes and select Continue

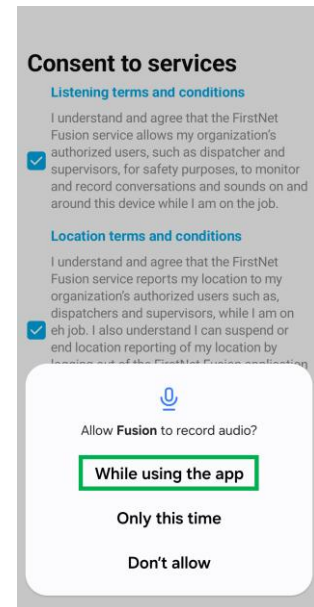

6. Next, the app asks for permissions to send you notifications, to take pictures and record video, to record audio, to make and manage phone calls, to find, connect to, and determine the relative position of nearby devices. Select **Allow** and **While using the app** for each of them.

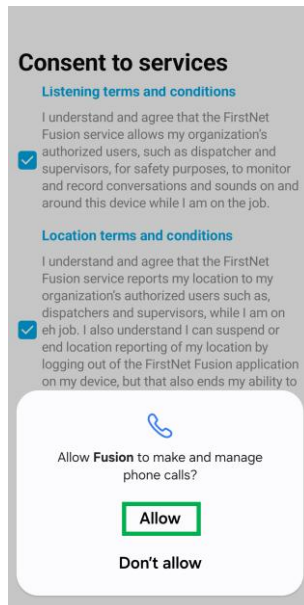

Select Allow

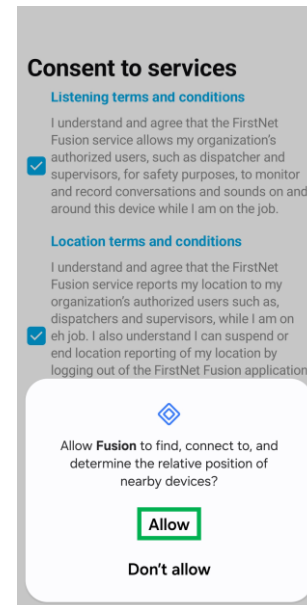

Select While using the app

Select While using the app

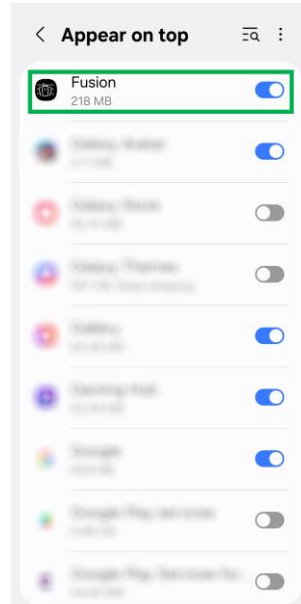

Select Allow

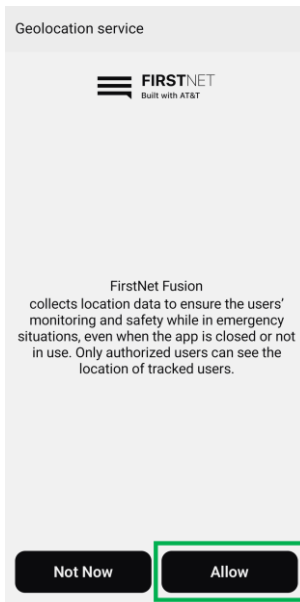

Select Allow

7. The next step is to allow permission for the app to appear on top.

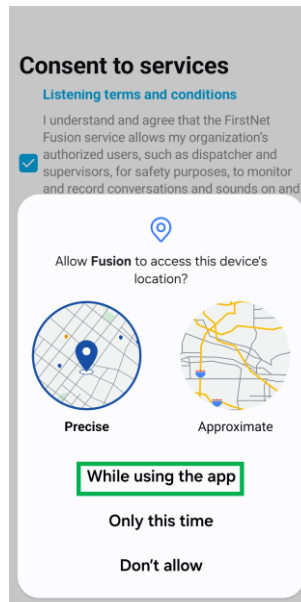

Enable appear on top

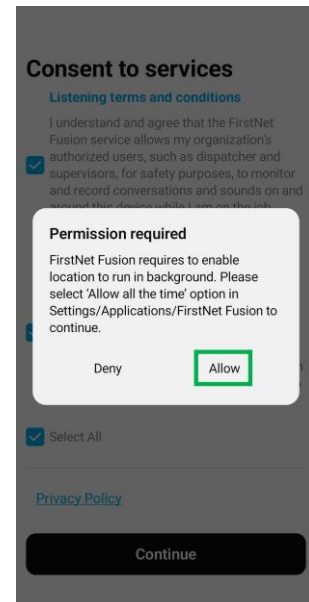

8. Next, you need to allow FirstNet Fusion to collect location data. This ensures the device can be always located by other Fusion users with the appropriate permissions. Select **Allow**, then select **While using the app**. Also, the app requires permission to run in the background. Select **Allow**.

Select Allow

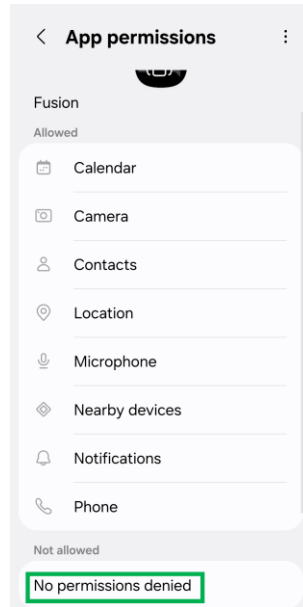

Select While using the app

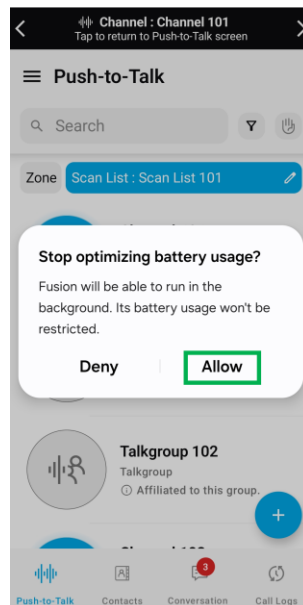

Select Allow

9. Allow any other permissions requests to maximize the features of Fusion.

Allow all permissions

10. The last step is to make sure the app is excluded from battery optimization. This overrides the phone's default settings and allows the app to run in the background, ensuring the user receives all the notifications and can be located through Fusion Dispatch. Select **Allow**.

Select Allow
