

Log Into Your Fusion Account as an AT&T / FirstNet User (SNAP Authentication) iOS smartphones

Important: Before proceeding, determine if your device has a FirstNet or AT&T SIM. If yes, you should log in via SNAP authentication, which allows fast, automatic user authentication to the Fusion service by reading SIM data. If you do not have an AT&T or FirstNet SIM, you should authenticate via Wi-Fi.

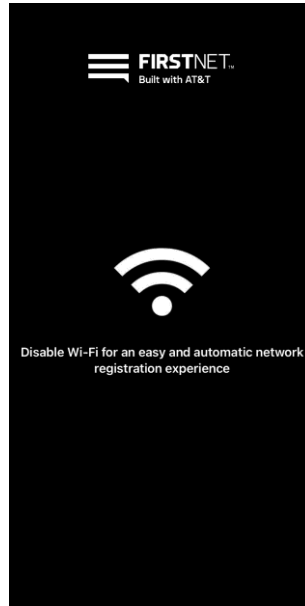

Before you begin, confirm that your organization administrator has assigned you a Fusion license and created your account. Once your setup is complete, follow the steps below to log in using AT&T / FirstNet SNAP Authentication.

1. First, download and install the application from App Store.

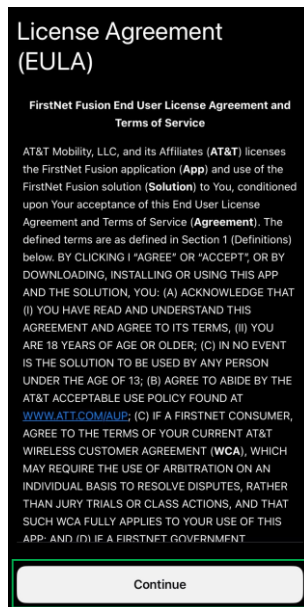

App Store > Search and install FirstNet Fusion

- Next, access the Fusion app on the device. Then, disable the Wi-Fi for an easy and automatic log in experience.

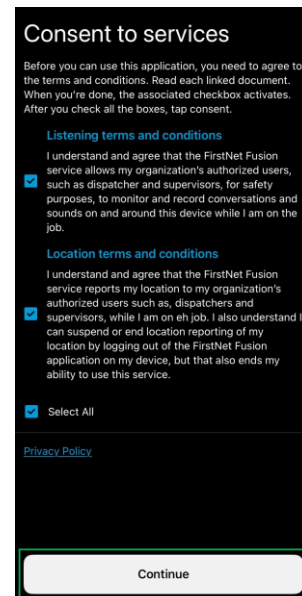

Disable Wi-Fi for automatic log in

- The device connects automatically reading the information from the SIM of the device for login. After the login, you are redirected to the EULA page. Read and Consent to Service.

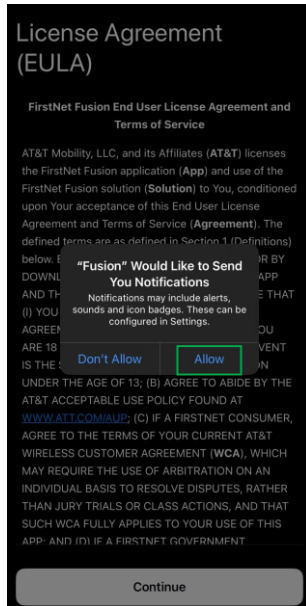

Continue

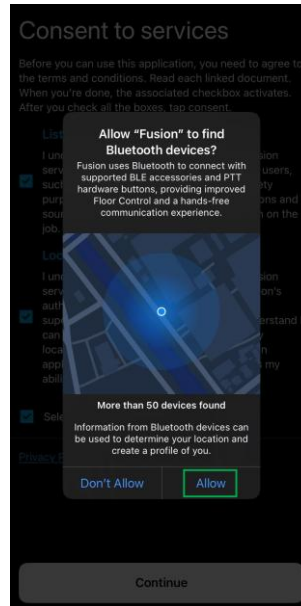

Check the boxes and select Continue

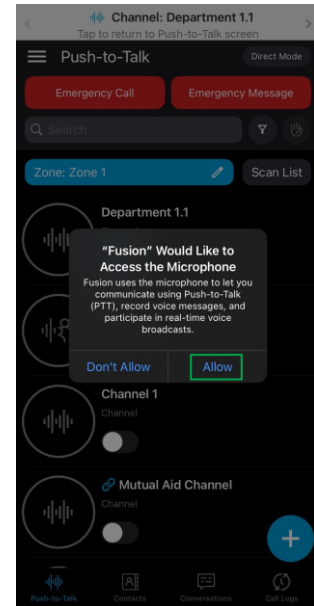

- Next, the app asks for permissions to send you notifications, find Bluetooth devices nearby, and access the microphone. Select **Allow** for each of them.

Select Allow

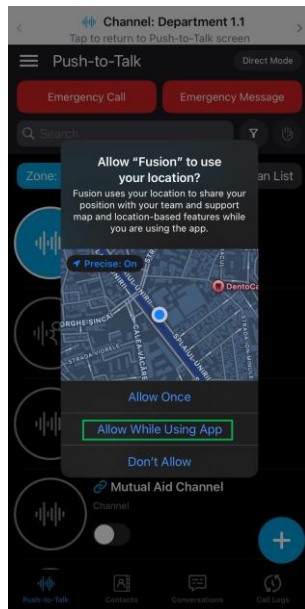

Select Allow

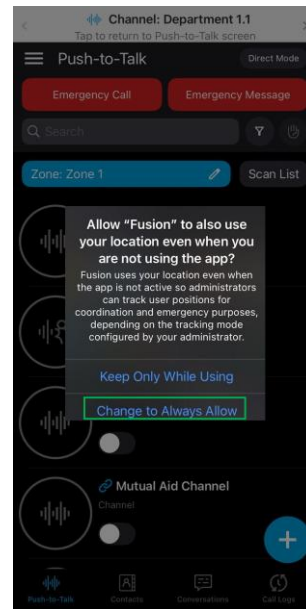

Select Allow

- Next, you need to allow FirstNet Fusion to use your location. This ensures the device can be always located by other Fusion users with the appropriate permissions. Select **Allow While Using App**.

When the pop-up asks to use your location even when the app is closed, choose **Change to Always Allow**.

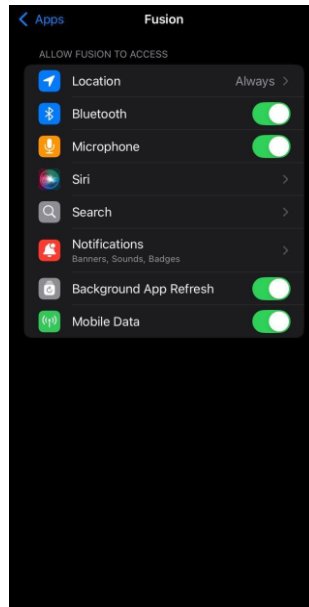

Select Allow While Using App

Select Change to Always Allow

6. Allow any other permissions requests to maximize the features of Fusion.

Allow all permissions
