

Log Into Your Fusion Account as an AT&T / FirstNet User (Wi-Fi Authentication) iOS smartphones

Important: Before proceeding, determine if your device has a FirstNet or AT&T SIM. If yes, you should log in via SNAP authentication, which allows fast, automatic user authentication to the Fusion service by reading SIM data. If you do not have an AT&T or FirstNet SIM, you should authenticate via Wi-Fi.

Before you begin, confirm that your organization administrator has assigned you a Fusion license and created your account. Once your setup is complete, follow the steps below to log in using Wi-Fi Authentication.

1. First, download and install the application from App Store.

App Store > Search and install FirstNet Fusion

- Next, access the Fusion app on the device. If SNAP automatic authentication is not possible, wait until the message **Continue with Wi-Fi Enabled** appears and select it.

Select Continue with Wi-Fi Enabled

- In the next screen, insert your phone number (ten-digit number with no spaces or special characters) and press the **Continue** button. The app asks you to sign in using firstnet.com, tap **Continue**.

Insert your phone number

Tap Continue

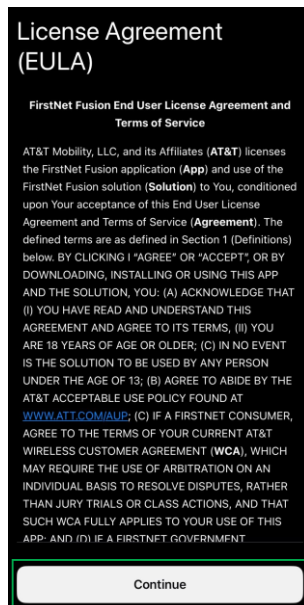

- Then, you are brought to the activation screen. Type in the activation code received via SMS, then tap the **Login** button.

The image shows the FirstNet Fusion Mobile login screen. At the top, there is a logo for FirstNet Fusion with the text 'Fusion Mobile' below it. Below the logo, there are two input fields: 'Phone Number' with the value '1111111111' and 'Activation Code' with the value '999999'. A blue 'Login' button is positioned below these fields. At the bottom, there is a copyright notice: 'Copyright © 2025 FirstNet Fusion. All rights reserved. Terms of Use | Privacy Policy'.

Insert your activation code then tap Login

- After the login, you are redirected to the EULA page. Read and Consent to Service.

The image shows the License Agreement (EULA) screen. The title is 'License Agreement (EULA)'. Below it, the text reads: 'FirstNet Fusion End User License Agreement and Terms of Service'. The main body of text describes the terms of service, including the requirement to agree to the terms by clicking 'AGREE' or 'ACCEPT'. At the bottom, there is a 'Continue' button.

Accept License Agreement

The image shows the 'Consent to services' screen. It starts with a warning: 'Before you can use this application, you need to agree to the terms and conditions. Read each linked document. When you're done, the associated checkbox activates. After you check all the boxes, tap consent.' There are two sections: 'Listening terms and conditions' and 'Location terms and conditions'. Each section has a checkbox that is currently checked. Below these sections, there is a 'Select All' checkbox, which is also checked. At the bottom, there is a 'Continue' button.

Check the boxes and select Continue

- Next, the app asks for permissions to send you notifications, find Bluetooth devices nearby, and access the microphone. Select **Allow** for each of them.

Select Allow

Select While using the app

Select While using the app

- Next, you need to allow FirstNet Fusion to use your location. This ensures the device can be always located by other Fusion users with the appropriate permissions. Select **Allow While Using App**.

When the pop-up asks to use your location even when the app is closed, choose **Change to Always Allow**.

Select Allow While Using App

Select Change to Always Allow

8. Allow any other permissions requests to maximize the features of Fusion.

Allow all permissions
